

MEETING REGULATORY STANDARDS WITH PROFITABILITY AND SUSTAINABILITY

Best in class absorption technology that is a game changer for process and facility environmental control in pharma companies..

Our innovative and proven solutions harness excess heat, helping you deliver on your sustainability and financial goals with minimal expenditure.

Benefits

-  Improve process efficiency and production rate
-  Enhance product quality
-  Reduce operational costs
-  Conserve resources and lower emissions

Our cooling and heating solutions find application in

- Bulk Drug Production
- Reactor Cooling
- HVAC/AHU Application
- Primary Condenser of Distillation Column
- Secondary Condenser of Distillation Column
- Solvent Recovery

Absorption Chillers

High COP - About 1.5

Heat Pumps

Delivers hot water up to 90°C (194° F)

Chiller-Heaters

Simultaneous cooling & heating saving up to 40% operational costs

Why Thermax's Solutions?

- Electricity-free cooling and heating
- Low steam consumption
- No vibrating parts
- Low maintenance
- No harmful refrigerants
- No requirement for LiBr / DM Water top-up
- Crystallization-free design
- 24x7 IIoT-based chiller monitoring
